Mirra® 2

Leaner, lighter, and as responsive
as your own shadow

Mirra 2
Designed by Studio 7.5

As work evolves, and we become more active, shifting from individual to collaborative work in an instant, we need tools designed to be as agile as our work style. To address this need, the designers of Studio 7.5 set out to create a high-performing chair that supports people who work in a constant state of motion.

Mirra 2 moves with you, at one with your body. When you sit, the seat and back adapt to you instantly. With dynamic surfaces that respond to your slightest movements and simple, intuitive adjustments to fine-tune the fit, Mirra 2 balances immediate comfort and personalized ergonomics in one sophisticated design.

Performance

Support for seated movement starts with a flexible, yet supportive chair that allows your body to move freely and naturally. Mirra 2's Loop Spine provides torsional flex, allowing you to stretch and reach laterally, while the Harmonic™ 2 tilt provides a smooth, balanced feel as you recline.

Two back options help Mirra 2 work for a variety of people and applications. The ultra-responsive Butterfly Back™ results from inventing a method for merging a fabric layer with polymer veins to create a dynamic hybrid structure that acts like a suspension membrane. The TriFlex™ back meets more rigorous cleaning protocols because there is no fabric layer. Both back options offer passive PostureFit® sacral support to prevent slouching and keep your spine properly aligned. And both are ventilated to keep you cool as well as supported, no matter how active you are.

Mirra 2's Harmonic 2 tilt, with its responsive leaf-spring design, creates a smooth and balanced feel as you move from one posture to another, whatever your size or stature—from 90 to 350 pounds.

The size, shape, and pattern of the holes in the Mirra 2 TriFlex back create zones of support that allow healthy seated movement.

The Butterfly Back is ventilated for thermal comfort and is ultra-responsive to deliver dynamic support as you move.

AireWeave™ 2 suspension seat is temperature neutral, so heat doesn't build up as you sit.

The FlexFront® seat edge easily adjusts to properly support your thighs as you sit.

Design

The lean design of Mirra 2 brings a sophisticated profile and visual lightness to any space. An emphasis on performance is visible. The chair's individual components and their function are apparent and celebrated, and vary accordingly in material and appearance.

As performance defines the look of the chair's components, their coloration allows significant options for defining your chair's overall aesthetic. Added selections for textiles, back loop and spine colors, and base finishes offer flexibility and encourage personalization.

About Studio 7.5

Designers Claudia Plikat, Burkhard Schmitz, Carola Zwick, and engineer Roland Zwick, founded Berlin, Germany-based industrial design firm Studio 7.5 in 1992. Their designs for Herman Miller, including Setu® Chairs, Mirra and Mirra 2 Chairs, and Metaform Portfolio™, reflect a desire to give people more control over their work environments and tools.
